# MAKE YOUR OWN LUMI

*With  
Emma and  
Madeleine*

# HOW TO MAKE YOUR OWN LUMI

## YOU WILL NEED:

- Toilet roll tube or half a kitchen roll tube
- Blue, red, orange, yellow, black & white paints/felt tips
- White & red paper/card
- Scissors
- Glue/tape

## INSTRUCTIONS:

- Paint your toilet roll tube white, or wrap it in white paper.
- Cut red and blue strips (approximately 4mm wide) from your paper and stick these, diagonally, to the top and bottom of your tube - **see example here**. Alternatively, you could add these using your paint or felt tips.
- Cut out the eyes and mouth templates and stick them onto your tube.
- Cut out the arms template and stick it to the tube, only gluing the back, and then bending the arms outwards at the sides.
- Cut a big red triangle out of your red paper, or cut out our necker template and paint/colour the central triangle red.
- Add blue and white stripes to the border of your triangle, or colour in the stripes on the template.
- Roll your triangle up from the long edge like a real necker - if you're using our template, the dotted lines show you where to do this.
- Wrap your necker around Lumi, above her arms. If you've got very nimble fingers and a lot of patience, you can try and tie a friendship knot! Otherwise, just cross over the two sides and stick them down.
- Cut out the flame template, paint/colour the red orange and yellow parts of the flame and black wick, then stick to the top inside Lumi.
